OneCare Private Network

Optimizing Network Performance and Scalability

Experience the Next Level of Network Performance and Reliability with CypressTel's Private Network Solution

CypressTel offers a robust Private Network service that can significantly improve your network infrastructure. Our service comes with two different topology options - fully meshed and layer 2 Ethernet - to provide your organization with high flexibility, secure, reliable, and efficient connectivity, ensuring the stability of your network operations. With our Private Network service, you can enhance your network security and minimize the risk of unauthorized access to sensitive data, empowering your organization to collaborate effectively and streamline your operations.

How it works?

Point-of-Presence in Asia Pacific and Worldwide

- Mainland China*
- Hong Kong
- Taiwan
- Singapore
- Japan
- Korea
- Europe
- USA

Our Private Network service simplifies the process of connecting multiple sites or branches, facilitating efficient communication, file sharing, and collaboration throughout your organization. Our network is designed to be scalable, allowing you to add or remove locations as your business needs change. It provides a highly efficient way to route traffic within a network, ensuring fast and reliable communication between multiple locations.

Key Features & Benefits

Fully Meshed & Layer 2 Ethernet Topology

Experience seamless and efficient connectivity between network endpoints with our fully meshed Layer 2 Ethernet topology. Our Point of Presence (PoP) coverage spans over 100 cities worldwide, ensuring reliable connectivity.

Traffic Optimization

Ensure seamless connectivity and enhanced user experience by efficiently routing packets based on assigned labels, reducing congestion and enhancing overall performance.

Class of Service (CoS) & Quality of Service (QoS)

Prioritize different types of traffic with CoS and QoS ensures critical applications receive necessary bandwidth and a consistent quality of service on our private network.

Scalability and Flexibility

highly scalable and can integrate with different network technologies, making it adaptable to existing infrastructure for large-scale networks.

High Availability

Ensure uninterrupted connectivity with reliable and secure architecture. Benefit from a 99.99% SLA through redundant and protected hardware and network. Access your network whenever you need it.

One-stop Network Solutions

Offers a comprehensive suite of network solutions, such as SD-WAN and SASE, to help businesses enhance their performance and security.

Why CypressTel?

- We are a carrier-neutral service provider and have a strong presence in Asia and China.
- We have built an extensive ecosystem of partnerships with industry leaders to provide advanced enterprise solutions.
- Our one-stop network solution provides a customized total business solution to meet your unique needs.
- We offer 24/7 multi-language customer support with certified experts who hold CCIE, CISP, CCSA, and other certifications.
- We hold ISO-certified and world-class accreditations and licenses to ensure compliance with regulations and industry standards.
