Data Center Services

Empower Your Business with Flexible and Cost-Effective Colocation

Elevate your Digital Presence with CypressTel Data Center Services

In today's data-driven world, organizations are constantly challenged with effectively managing and harnessing the vast amounts of data they generate and consume. As businesses increasingly rely on data for decision-making, compliance, and operational efficiency, having a centralized and secure infrastructure is crucial.

CypressTel offers Data Center services that enable you to seamlessly set up and integrate your infrastructure, ensuring uninterrupted performance and robust security for your critical business operations. Our solutions provide flexible and cost-effective hosting options that can scale with your business needs. Our state-of-the-art data centers and network infrastructure offer fast and reliable connections, enabling you to boost productivity and outperform the competition.

How it works?

Data exists and is connected across multiple data centers, the edge, and public and private clouds. The data center must be able to communicate across these various sites, both on-premises and in the cloud.

Key Features & Benefits

Robust Infrastructure and Resource Availability
Our global network comprises over 30 data centers that comply with carrier-class Tier III+ Telecommunication Infrastructure Standards, providing high utility power and enabling interconnection with any network or cloud provider.

Improved Reliability and Network Performance
Our global backbone has high-speed, low-latency network connections that help businesses deliver fast services to customers while reducing network latency by 7x. Our 24/7 security patrol ensures network security at all times.

Network Hub to China
Our network backbone offers extensive coverage, with 120+ Network PoPs globally, including 60+ in China. This provides an ideal gateway to establish a stable and scalable infrastructure for expanding business opportunities in Asia and China.

Enhanced Security and Compliance
Ensure compliance with industry regulations and standards, including HIPAA, SOC 2, and PCI DSS, to fulfill specific security and compliance requirements, attain a 99.99% Service Level Agreement (SLA), and uphold ISO standards.

Cutting-edge One-stop Managed Service
We provide a comprehensive managed service covering end-to-end network, cloud, and security solutions. You won't need to search for various providers for different solutions. CypressTel will provide customized solutions and allow you to concentrate on business development in the digital era.

Why CypressTel?

- We are a carrier-neutral service provider and have a strong presence in Asia and China.
- We have built an extensive ecosystem of partnerships with industry leaders to provide advanced enterprise solutions.
- Our one-stop network solution provides a customized total business solution to meet your unique needs.
- We offer 24/7 multi-language customer support with certified experts who hold CCIE, CISP, CCSA, and other certifications.
- We hold ISO-certified and world-class accreditations and licenses to ensure compliance with regulations and industry standards.
