

Internet Access

Accelerate Your Business and Streamline Your Operations for Maximum Efficiency

Experience Uncompromising Speed and Privacy with CypressTel Internet Access Service

In the present digital era, a fast and dependable internet connection is crucial for businesses to flourish. CypressTel offers reliable and consistent enterprise-grade dedicated internet access (DIA) services specifically designed for local office LAN environments. These services provide stable and symmetrical bandwidth, ensuring uninterrupted internet connections through Ethernet connections at your location.

For enterprises seeking high-speed and stable network connections, we provide Premium DIA services, which are built on a Cloud Network Connection (CNET). These services offer seamless connectivity with global cloud platforms, and enhance performance between domestic and international sites.

CypressTel provides 3 types of service models:

Option 3

Business Management, Monitoring & Control

Network and Business Application Management (Network, Equipment & Fault Management, etc.)

Option 2

Equipment Installation & Maintenance

Provide CPE or SD-WAN with installation (Support Cisco, VMware, Fortinet, HPE Aruba Networking, Huawei and others)

Option 1

Last Mile Connection

Provide Last Mile Internet/Lease Line Access Service (Ethernet, Broadband, DIA/PDIA/CN2, LTE/5G, FTTH, etc.)

Key Features & Benefits

Redundant and Diverse Connectivity

Use multiple DIA connections from different providers to increase network resilience and avoid single points of failure during disruptions or outages.

Dedicated Bandwidth

Ensure stable connectivity and fast uploads and downloads for large data files and high-bandwidth applications such as VPN, email server, web server, and video conferencing, even during peak usage periods.

Global Network Connectivity

Enjoy lightning-fast internet connections worldwide with coverage in major regions such as Asia, the United States, and Europe.

Direct BGP Peering

Optimize routing and traffic by establishing BGP peering with multiple global carriers and cloud providers across various countries, including Hong Kong, Singapore, and Tokyo, to reduce latency and improve performance.

Robust Service Level Agreements (SLAs) and 24/7 Management and Support

Robust SLAs ensure high performance and stable connectivity. Reliable support provides prompt issue resolution with 24/7 service.

Performance Monitoring and Optimization

Monitor latency, packet loss, and throughput to identify areas for improvement and take appropriate measures to maximize internet access to global regions.

Why CypressTel?

- ✓ We are a carrier-neutral service provider and have a strong presence in Asia and China.
- ✓ We have built an extensive ecosystem of partnerships with industry leaders to provide advanced enterprise solutions.
- ✓ Our one-stop network solution provides a customized total business solution to meet your unique needs.
- ✓ We offer 24/7 multi-language customer support with certified experts who hold CCIE, CISP, CCSA, and other certifications.
- ✓ We hold ISO-certified and world-class accreditations and licenses to ensure compliance with regulations and industry standards.
