Internet Access

Unleash Blazing Connectivity for Your Digital Future

In today's fast-paced digital era, reliable internet is essential for success. CypressTel's Internet Access solution provides enterprise-grade Dedicated Internet Access (DIA) with dark fiber, IP transit, and last-mile connectivity, ensuring high speed and strong privacy. With over 140 PoPs, our advanced network allows you to streamline your clients' operations, build unbreakable trust, and secure valuable contracts in diverse global markets. We offer a 99.99% SLA that guarantees stable and scalable connectivity, enhancing your clients' performance for cloud services, applications, and overall growth.

CypressTel provides 3 types of service models:

Option 3
Business Management, Monitoring & Control

Network and Business Application Management (Network, Equipment & Fault Management, etc.)

Option 2
Equipment Installation & Maintenance

Provide CPE or SD-WAN with installation (Support VMware, Fortinet, Cisco, HPE Aruba Networking, and others)

Option 1
Last Mile Connection

Provide Last Mail Internet/ Lease Line Access Service (Ethernet, Broadband, DIA/PDIA/CN2、LTE/5G、FTTH, etc.)

Key Features & Benefits

Redundant Connectivity
Our Internet access solution utilizes dark fiber, local access, and last-mile connections across multiple providers to ensure seamless resilience. Diverse DIA paths prevent disruptions, keeping your clients' networks online and increasing trust and uptime in dynamic digital markets.

Dedicated Bandwidth
Our enterprise-grade DIA and Premium DIA offer symmetrical, stable bandwidth for high-demand applications such as VPNs, video streaming, and cloud services. Reliable performance during peak usage enhances client loyalty and helps secure valuable contracts.

Global Network Access
With over 140 PoPs and service coverage across more than 300 cities, our Internet access solution provides lightning-fast connectivity. Smart routing improves cloud access, enabling businesses to scale their clients' networks and seize global opportunities.

Direct BGP Peering
Optimize network traffic with direct peering to global carriers and cloud providers in various markets. Reduce latency and ensure fast cloud access for real-time applications, empowering businesses with scalable, high-performance connectivity for enterprises.

Why CypressTel?

Choose CypressTel for a scalable, carrier-neutral network with over 140 PoPs globally, ensuring seamless connectivity. Our tailored solutions foster long-term success through AI-driven insights and 5G speed. With over 17 years of experience and the deployment of more than 10,000 customer sites, we optimize costs and enhance customer experiences, all backed by reliable 24/7 local support for high-performance results.
